

Yale 2017 ISTF Conference

January 27-28, 2017

Partnerships and Collaborations in Tropical Forests

Shape the conversation

The January 2017 Conference of the International Society of Tropical Foresters at Yale University, [“Tropical Forests in a Connected World: Collaborative Solutions for a Sustainable Future”](#) will focus on the need for multidisciplinary teams working towards collaborative solutions that ensure the health of tropical forests and the well-being of those living in or depending on them.

This conference will provide an opportunity for participants to cross-pollinate ideas, exchange experiences, and pave the way for collaboration across sectors. Tangible products from the event will inform the emerging discussion on the changing approach to sustainable development in the tropics.

If you are interested in participating in this timely discussion, please see our Call for [Building Block Talks and Posters](#)

(due November 1st), Call for ISTF

[Innovation Prize](#)

Applications (due November 7th) and
